## ACCESSORY SHOCK MOUNT ADAPTER FOR CM-700 MICROPHONE

The Crown® CM-SM is a mic-stand adapter that isolates a CM-700 microphone from mechanical vibration. It will also work with other 3/4-inch diameter mics that are similar to the CM-700 in weight and size.

Because of its elastic suspension, the shock mount reduces stand and floor thumps by at least 22 dB (A weighted). For even more shock isolation, switch in the low-cut filter on the CM-700.

A thumbwheel on the shock mount lets you clamp the mic cable. This keeps the mic oriented correctly and prevents cable noise from reaching the mic. The 5/8" - 27 thread mates with standard American mic stands and booms.

**Net weight:** 4.3 ounces (122.5 grams).

**Included accessories:** 8 replacement rubber bands, part no. 100515-1. Threaded adapter for European mic stands (3/8" - 16) and photographic stands (1/4" - 20). These two threads are on opposite ends of the unique reversible adapter, part no. D 7092-6.
